Carroll Ave., S. - MIRROR

**One Section and a Half**, 7 miles from Mirror; 200 acres under cultivation. This is an A1 stock farm.

**Storey and a Half House**, 6 rooms, pantry, 3 Closets, cellar, plastered and well built throughout; close to Depot. For terms of the above apply to—

Fred. Dowsell, Carroll Avenue, Mirror

does Mr. Bennett, a Conservative member of parliament, sworn to serve his constituency and the people of this province, see anything wrong in his participation in the profits of an elevator monopoly that he should seek to hide, but on the contrary seems to consider it good business that he is smart enough to profit by the fact that the farmers are unable to help themselves in this matter. He, instead, sees something in it of which he should be proud, and no later than November 5 last, at a public meeting in Calgary, where he was attempting to defend his attitude in keeping the Grand Trunk Pacific railway

President, G. H. Darlow ;

W. R. Brown, U. G. Marryat,  
Alice

The game was played in three periods of twenty minutes each, and from the face-off Mirror carried the puck into Bashaw territory, and shot after shot was ruined in on Jarvis, who played a whale of a game in goal. He had the advantage, however, of guarding a four-foot wide goal that kept the Mirror forwards guessing to locate. The first period ended with no score on either side.

The cleanness of the game was a noticeable fact, only one Bashaw player decorating the mourner's bench, and that for a minor offense. For Bashaw, Shanks and Jarvis were the pick of the team, while the whole Mirror team played a consistent game throughout. The line-up: Bashaw (2)  
Mirror (2) MacCondach goal Jarvis

MaeMillan	point	Lawrence
Suggett	c. point	Shanks
Cairns	rover	Wilson
Crandell	r. wing	Holt
Halpany	centre	Fisher
Good	l. wing	N. Jarvis

Mark Whitecotton, referee

A return game 'may' be played.

The Trochu hockey team is anxious to take a crack at the Mirror septette, and a game will likely be arranged in the first mentioned town.

## SIFTON'S ELEVATOR POLICY

[Continued from page 1]

out of Calgary, and thus out of competition with the C. P. R., the company he was formerly affiliated with to the disadvantage of the general public who had litigation with that road, he openly declared: "I lose more money by that road being kept out than most people in this audience. I need that road coming in to make money for my elevators." The above is quoted from the verbatim report of the speech appearing in the Calgary Herald next day, and the Herald is the leading Conservative organ in the province.

When conditions arrive at this pass, that a railroad corporation will assist in the building up of an elevator monopoly designed to rob the farmer, and when men in public life glory in the fact that they are participating in the profits of this monopoly, the perfectly natural thing is that the farmers themselves should seek, through their associations, a means of escape from the monopolies by the application of co-operative methods.

The farmers, through the executive of the United Farmers of Alberta have taken the first step towards making their escape and they have been met decidedly more than half way by the Liberal government; the same government that has already abolished the telephone monopoly and given the residents of this province one of the best public owned, self-supporting utilities on the American continent through its acquisition of the Bell Telephone, and has disintegrated another monopoly through its action in the courts against the lumber combine has taken the first step towards ridding the farmers of Alberta from the burdensome elevator monopoly.

There is no mistaking the attitude of Premier Sifton and his colleagues on this question of farmers elevators.

To use Premier Sifton's own words: "The government of Alberta is favorable to assisting in the construction of farmers elevators with proper precautions taken to see that the farmers get the advantage of these elevators; and also to see that the control of them does not pass out of the hands of the farmers of Alberta; and that

the money advanced by the province is properly safeguarded, together with the rights of the farmers themselves."

But Premier Sifton has not let the matter rest with a mere statement. He has appointed Hon. M. McKenzie, provincial treasurer; Hon. C. Stewart, of municipalities and E. J. Freese, Manager of the Grain Growers Grain Co. and adviser to the United Farmers of Alberta a committee to draw up legislation, and crystallize their ideas into an act that will meet the requirements of the farmers and at the same time properly safeguard their interests and the money advanced by the government. He also authorized this committee to secure the services of A. G. Mackay, barrister to draw up legislation, and this has been done. That legislation will be presented at the forthcoming session of the legislature, and it will be presented by the Sifton government.

President Tregillus, Secretary Woodbridge, Vice Presidents Quincy and Carswell and director Beveridge and Mr. Freese are delighted with the manner in which they were received by the premier and the sympathetic interest taken in the matter of farmers elevators. They believe, and rightly so, that the solution of this important question for the farmers is at hand, and they are warm in their praise of the government which has shown its sympathies and its aims to improve the conditions of the farmers of Alberta.

The attitude of the Sifton government is a good one. It is in direct contrast to the attitude of Mr. Bennett and his elevators. In the case of the government it is a policy of elevators for the farmers, controlled by the farmers and the breaking up of the monopoly which has already held away too long in this province.

Arrangement has been made by the Salvation Army Immigration Department to bring a large number of immigrants to this province during the present season to engage in farm and domestic service. These people come from Great Britain and a large number from rural districts accustomed to work on the land. The people who come under the auspices of the Army are of a very desirable class and of good reputation, selected by experienced agents who are familiar with the class of workers Canadian farming conditions call for. The first conducted party will set sail on the "Empress of Britain" Feb. 21. As there will be a large demand for laborers for Ry. construction this spring, farmers who desire to secure help, married or single, experienced or inexperienced, should at once get in touch with the Army. Write for application forms to the Salvation Army Immigration Officer, 221 Rupert Street, Winnipeg.

It is stated upon good authority that Canada is now receiving as large a number of immigrants each year as the United States did when her population was 40,000,000—and they are a better class of citizens too.

W. P. HINTON, General Passenger Agent,  
Union Depot, Winnipeg.  
GEO. MacMILLAN, Agent, Mirror, Alta.

The Shining  
Morning Smile

Is a trade winner. Try it. But man cannot live by mowing trade alone. Therefore the smile should stay on the job all day. And not only should the merchant's face smile, but his store front, likewise. To make a store front smile keep it clean. Have a bright and attractive display in the window. If the merchant smiles and his store front smiles the customer will smile, and everybody will be happy. To make a town smile clean the streets and have attractive buildings and lawns.

Prosperity smiles while failure has a frown.

Smile, smile, smile! Get the habit!

SMILE!

## ORIGIN OF THE PEARL.

The Pried Gem Only the Brilliant Seraphus of a Worm.

Science has discovered the real origin of the pearl to be a worm. Dr. Hugh M. Smith gives some interesting information on this subject in the National Geographic Magazine.

We know that almost any foreign body—a grain of sand, a bit of mud or shell, a piece of seaweed or a small animal—may by its irritation cause the mollusk to cover it with nacre and make it the nucleus of a pearl, but the largest part of the annual pearl crop of the world is due to parasites that normally pass a part of their life cycle within the shell of the pearl oyster.

Minute spherical larvae of marine worms known as cestodes become lodged in the soft tissues, as many as forty having been found in one Ceylon oyster. As the result of irritation the oyster forms a protecting sac about the intruder, and then, if the larva dies, its body is gradually converted into carbonate of lime, and the partly mass proceeds to grow with the shell.

If the larva lives it may pass into the body of the strong jawed trigger fish which prey on the pearl oyster, there undergoing further development. Ultimately it reaches the body of the great rays, which in turn eat the trigger fish, in the rays the parasite attains full development and produce larvae that are cast into the sea and find lodgment in pearl oysters. Thus the cycle is begun once more.

We may literally accept the saying of a celebrated French investigator that "the most beautiful pearl is in reality only the brilliant seraphus of a worm."

## FAITH OF THE FOREST.

Curious Traits of One of the Savage Tribes of Siberia.

Concerning one of the obscure races of northwestern Siberia a traveler writes: "A few of the traits of these curious people may prove of interest, as they show that environment is the strongest factor in determining character. Their intense superstition is accounted for by innate fear of all things they cannot understand. Their shy, almost, dislike of strangers and dread of their lamas and chiefs are again the result of superstition and seclusion. Business and merchandise are stamped on their faces, as is natural to a people who are in constant fear of the gaze of the mountain, river and forests, whose whole time is taken up with propitiating the gods lest evil befall them."

"The Urkhal is a product of the forest as the Arab is of the desert. The one is the antithesis of the other. Environment has molded the character of his surroundings. The common belief in one God, the nomad of the small desert, compares strikingly with the superstitious idolatry of dark, damp forests, foreboding of evil spirits and cringing under their witch doings."

"All through life the forest dweller is in fear of offending the deities, and at death his corpse is carried out and placed on some lone hilltop, where the wild beasts are expected to devour it if the man has led a good life, but had Urkhal have not that doubtful honor bestowed upon them?"—Chicago News.

## Ventilation.

Have we ever stopped to think how our ancestors two or three generations back lived and furnished with little or no ventilation in their sleeping apartments? The night air used to be considered a very dreadful menace to health and a sure indicator of cold. Bedrooms were kept closely shut, and yet our ancestors, many of them, were harder than we and lived to good old ages. Animals burrow in their holes at night, breathing the same air over and over again, while birds and fowls tuck their heads under their wings. Of course ventilation is absolutely necessary for proper comfort, cleanliness and health, but people have lived on little or none of it for hundreds and thousands of years.—Exchange.

## A Giant Popsy Saw.

"King James I. had a gigantic porter eight feet six inches in height, but he was not perfect, being round shouldered, knockkneed and lame in one foot. Of a similar height was Charles Muttart, a groom of the Hanoverian guard who died in 1676, and seven years before there was being exhibited in London a Dutchman eight feet nine inches high named whom in Popsy they we find the following entry on Aug. 15, 1698: "Went to Charting House to see the great Dutchman. I did walk under the arm with my hat on and could not reach his chin with the tip of my fingers."

## Happiness.

If you cannot be happy in one way, be in another, and this faculty of desecration wants but little aid from philosophy, for health and good humor are almost the whole affair. Many run about after felicity, like an absent-minded man hunting for his hat while it is in his hand or on his head.

## A Safe Wage.

Townley—Sign one has said that he is a benefactor of his race who makes two blades of grass grow where only one grew before. Souldine—I'll bet anything that fellow never had to run a lawn mower.—Boston Transcript.

## Two Puns.

Miss Young—After all, what is marriage but a snare?  
Miss Older—Yes, and what is spinsterhood but perpetual misery?—Lion and Tit-Bits.

## THE MIGHTY ONION.

A Tribute to This Vegetable With an Artistic Temperament.

Kill the onion and you leave a gap in the universe. Kill anything else and there is a substitute. The potato is akin to the cereals; squash and radish and turnip and cauliflower are of the same family; beans are elongated peas; the leek is a penultimate orange, beef reincarnated grass, watermelon just the survivor of a very fit cucumber, and so on.

But the onion is sui generis, alone, unique, triumphant. It is a special creation to tempt the palate of a weary world.

The onion proves the futility of man's wisdom. He might have guessed at everything else under the sun, but he would have never guessed an onion. Science may deduce a new star before it becomes visible or radium before its discovery, but this ancient, sturdy vegetable would have gone unperceived forever had not its own insinuating yet not harmful qualities forced themselves into tear brimmed eyes and luscious anticipatory lips.

With what a mixture of gratitude and awe should we view the spectacle of nature turning her energies to the transmuting of mere clay into a vegetable with an artistic temperament!—Richmond Times-Dispatch.

## FRENCH GUYS FACTOR

## IN BALKAN VICTORIES

## Most Military Men Except Germans

## Conclude That French Army Meets

## Artilery in the World

The French during the time of the Balkan campaign were the only army that had the wrong horse, and the ammunition of their allies was very inadequate to the needs of the Balkan war, however, French sympathies have been the same, and the allied states, and their victories have been hailed with enthusiasm. But apart from the pleasure felt by Frenchmen at the successful efforts of the little power to overthrow the Turk, there is a national pride in the fact that the Balkan war was the first in which the French and the Greeks have vanquished the troops of the ally because they learned the art of war in French military colleges and fought with French cannons.

When, further, it is remembered that at Kiri Killas and Lala Burgas the French guns were matched against German artillery, it will be conceded that the crushing defeat inflicted on the Turks at these battles is none other than the triumph of French artillery over German artillery. The Balkan war has been very largely a question of guns, and that the French have been the victors in the Balkan war is the result of the fact that the French artillery of the Balkan war has resulted in the triumph of the cannon made in France.

The selection of French guns by the allies was not due to accident or hazard, but to the fact that the French have been the victors in the Balkan war, and the French artillery of the Balkan war has resulted in the triumph of the cannon made in France. The French have been the victors in the Balkan war, and the French artillery of the Balkan war has resulted in the triumph of the cannon made in France.

Most military men—Kaiser, will admit, officers generally admit that the French have the best artillery in the world. The French have been the victors in the Balkan war, and the French artillery of the Balkan war has resulted in the triumph of the cannon made in France.

A German artillery officer, who witnessed the battle of Lala Burgas, declared that the day was won not by the rifle fire of the Bulgarians, but by their cannon, and that the French artillery was the victor in the Balkan war, and the French artillery of the Balkan war has resulted in the triumph of the cannon made in France.

With Hoffman Philip, the secretary of the Turkish Committee, and Maurice Barthe, the well-known writer, he goes out to San Stefano each day, and he is able to save a number of lives. The first work, however, is to simply in clearing up the camp.

All who visit San Stefano agree in declaring that Miss Alt, who originally came from Switzerland, but has been in the Balkan war, and the French artillery of the Balkan war has resulted in the triumph of the cannon made in France.

With Hoffman Philip, the secretary of the Turkish Committee, and Maurice Barthe, the well-known writer, he goes out to San Stefano each day, and he is able to save a number of lives. The first work, however, is to simply in clearing up the camp.

## THE ROOSEVELT DAM

## One of the Remarkable Engineering

## Feats of the Age

## The Roosevelt dam in Arizona, the

## most important masonry structure put

## under construction by the reclamation

## service, was formally dedicated on the

## evening of March 1st, by former Pres-

## ident Theodore Roosevelt in the pres-

## ence of the prominent territorial of-

## ficials, the government engineers and

## citizens from all parts of the south-

## west.

## The dam is one of the most im-

## portant engineering feats of the age,

## and its construction is one of the

## most important masonry structures of

## the world. The dam is one of the

## most important masonry structures of

## the world. The dam is one of the

## most important masonry structures of
